
Clinical Professor, Global Economy (Rank TBD)

Against a backdrop of innovation and momentum and a deep commitment to building a globally recognized and academically rigorous program, the NYU School of Professional Studies seeks a Clinical Professor (Rank TBD) to build and lead its Global Economy Concentration within the Center for Global Affairs. The successful candidate will be a committed educator and industry leader with evidence of significant contributions in academia and the private or public sector.

The Clinical Professor (Rank TBA) will develop and lead the Global Economy concentration. Courses clustered under this concentration include a core international political economy course, as well as electives that examine the global economy through a variety of lenses including global financial markets, corporate power and social responsibility, globalization and interdependence, patterns of economic growth, corporate finance, international trade and business, public-private partnerships, technology and innovation, and the role of international/multilateral financial and trade institutions, among others. This concentration has evolved out of the existing Private Sector concentration, in which some existing courses will be updated to address current developments in the global economy.

NYU seeks an individual with professional experience as well as excellent academic credentials who will be able to identify challenges facing the global economy, help shape a responsive curriculum, teach existing, as well as new courses, and work collaboratively with other concentrations across the Center for Global Affairs.

New York University: An Introduction

More than 175 years ago, Albert Gallatin, the distinguished statesman who served as secretary of the treasury under Presidents Thomas Jefferson and James Madison, declared his intention to establish "in this immense and fast-growing city ... a system of rational and practical education fitting for all and graciously opened to all." Founded in 1831, New York University is now one of the largest private universities in the United States. Of the more than 3,000 colleges and universities in America, New York University is one of only 60 member institutions of the distinguished Association of American Universities.

From a student body of 158 during NYU's very first semester, enrollment has grown to more than 40,000 students attending 18 schools and colleges at five major centers in Manhattan and in sites in Africa, Asia, Europe, and South America. Today, students come from every state in the union and from 133 foreign countries. The faculty, which initially consisted of 14 professors and lecturers (among them artist and inventor Samuel F. B. Morse), now totals over 3,100 full-time members whose research and teaching encompasses the humanities, the sciences, and the social sciences; the law; medicine; business; education; the fine arts, studio art, and the performing and cinematic arts; music; social work; public administration; the ancient world; and professional studies. With more than 2,500 courses offered, the University awards more than 25 different degrees. Although overall the University is large, the individual schools and colleges are small- to moderate-sized units - each with its own traditions, programs, and faculty - and there are many communities to be found within the NYU community based on interests, activities, and shared experiences.

The center of NYU is its Washington Square campus in the heart of Greenwich Village. One of the city's most creative and energetic communities, the Village is a historic neighborhood that has attracted generations of writers, musicians, artists, and intellectuals. NYU, in keeping with its founder's vision, is "in and of the city": the University - which has no walls and no gates - is deeply intertwined with New York City, drawing inspiration from its vitality.

In addition to its Manhattan locations, the University is also located in Brooklyn with the second oldest school of engineering and technology in the country, and has research facilities, notably the Nelson Institute of Environmental Medicine, in Sterling Forest, near Tuxedo, New York.

And NYU has established itself as the first global network university, with a comprehensive liberal arts campus in Abu Dhabi – the first to be operated abroad by a major U.S. research university – and other sites for study and research in Accra, Ghana; Berlin, Germany; Buenos Aires, Argentina; Florence, Italy; London, England; Madrid, Spain; Paris, France; Prague, the Czech Republic; Shanghai, China; and Tel Aviv, Israel, among other locations.

New York University: Mission

Great cities are engines of creativity, and New York University takes its name and spirit from one of the busiest, most diverse and dynamic cities of all. Thriving beyond borders and across academic disciplines, NYU has emerged as one of the most networked and extensive worldwide platforms for learning, teaching, researching, building knowledge, and inventing new ways to meet humanity's challenges. Its students, faculty and alumni feed off the stimulating power of swirling intellectual and cultural experiences by mastering academic disciplines, expressing themselves in the arts, and excelling in demanding professions.

New York University's mission is to be a top quality international center of scholarship, teaching, and research. This involves retaining and attracting outstanding faculty who are leaders in their fields, encouraging them to create programs that draw outstanding students, and providing an intellectually rich environment. NYU seeks to take academic and cultural advantage of its location and to embrace diversity among faculty, staff and students to ensure a wide range of perspectives, including international perspectives, in the educational experience.
